- Serial Numbers: Each primary and secondary tank has a unique serial number (8 total across the set). All were installed together as a matched set. Full list available on request.
- Dimensions (Approx.): OD 11'-11", Overall Height 14'-10.5"
- Ladder: Each system includes its original 15' climbing ladder
- Shipping Weight: ~5,400 lbs. per system

Description

The PolyProcessing SAFE-Tank® system is a “tank-within-a-tank” design providing built-in secondary containment to help prevent equipment damage, fluid loss, or safety hazards in the event of a spill.

These systems were installed in a California water softening facility that was later decommissioned when a community water system came online.

Service History: Reported by previous owner, Tanks have only contained water from the facility's water plant — never exposed to chemicals, fertilizers, or fuels.

Third-Party Hydrottested: Independent testing firm filled each tank with water and monitored for 24+ hours; no leaks observed. Tanks were separated and cleaned before testing.

Condition: Cosmetic blemishes present, but tanks appear fully functional.

Design Benefits:

- Inner primary tank shielded from UV sunlight
- Secondary containment protects against chemical attack
- Extended service life compared to single-wall tanks

Manufacturer Reference

Full technical specifications and approved fluid compatibility guides are available on the PolyProcessing website.

Terms of Sale

- As-Is, Where-Is: No warranties or guarantees of condition or accuracy.
- Included: Only items shown in photos (no extra accessories).
- Buyer Responsibility: Inspect photos carefully. Contact us before purchase if clarification is needed.
- No Returns: All sales final.
